

## UV BOOST FEATURES AND STATISTICS

**UV Boost is a concentrated water-based liquid stain additive that contains a new technology ultraviolet light inhibitor.**

Lifeline Exterior Clear  
with UV Boost

No Treatment (control)

Lifeline Exterior Clear  
without UV Boost

1. Shake container of UV Boost.
2. Add entire contents to the appropriately sized full container of stain or finish.
3. Shake or stir the container of stain or finish until the contents are thoroughly mixed.
4. Apply stain or finish according to the labeled directions.
5. Any stain containing UV Boost that is left over once the initial coat is applied may be used for subsequent coats. Just be sure to “box” the remaining stain to assure a uniform color.
